

INTRODUCTION

Herewith we present you the bull catalogue of Bles Dairies East Africa Ltd., with specially selected bulls for the Kenyan circumstances e.g. high trait value in milk volume, good fertility and calving ease, good udders with above average mastitis resistance and good feet and legs.

The focus of Bles Dairies East Africa is helping farmers get the most out of their herd through quality control and complementary advisory services with for example ultrasound pregnancy diagnosis. We follow up on our sales and troubleshoot problems together with our farmers to make sure they are able to get their cows in calf with our high quality semen for maximum farm profitability.

For orders and more information kindly contact our sales team:
